

spraying & precision ag **NEWS**

SUMMER 2011/2012

As we settle into the new year it hasn't taken long to get back into the swing of things. The move to our new premises on Lucindale Rd in August expanded the spray store, and we are busy in the new space manufacturing CropStalker shielded sprayers and custom booms. The new Trimble EZ Pilot is proving popu-

lar as we are installing these on all sorts of machines. We are excited to have been appointed as the regional dealers of GreenTech and Apache sprayers, providing further range and support in the South East. We have made ordering easier with our new online store and we look forward to a bit of banter via face-

book and twitter, and of course more spraying and gps videos uploaded to youtube! Wishing you a prosperous 2012.

A new year & a big new sprayer!

Apache Self Propelled Sprayer

We are very excited to be appointed as a dealer for Apache Sprayers. Equipment Technologies have been manufacturing Apaches in Indiannapolis for 15 years. Simplicity of the spray system and drive train, quality components, and value for money has made the Apache the most sought after mechanical drive sprayer on the market.

Featuring 18-36m booms, 2800-4500L

product tanks, Cummins engines, Trimble or Raven rate control, large quiet cab, limited 5yr warranty on sprayer & 2yrs on engine. Excellent value and up to 40% more fuel efficient than Hydraulic drive machines. We will be holding Test Drive n' Ride days in March - call to register.

WIN A SEE-SAW HANDHELD CAMERA.

Visit our new website and enter your details to be in the draw to win a See-Saw handheld camera. Watertight, 3 hrs continuous recording time, records a full 30 frames per second, High resolution, Sony CCD Sensor, MPEG4 Video Compression, JPEG Photo, 640x480 Video Output. **RRP = \$290 inc GST**

Competition closes 6pm 31/03/12.

Product Test Drive: The new EZ-Pilot

In September Trimble released it's high accuracy assisted steering system - the EZ-Pilot. It sits in-between the entry level EZ-Steer and the top of the line AutoPilot. We have found it to be a really neat installation, and extremely quiet operation. It uses the tractor's existing steering wheel and doesn't obscure gauges and the dash. The motor is integrated into the steering column and provides better steering of vehicles with more rigid power steering systems, such as

trucks and older tractors, and the T3 technology automatically adjusts the steering for rough terrain. The steering wheel is turned with its integrated electric motor drive using guidance from the CFX-750 display or the FmX integrated display.

CFX-750 and EZ-Pilot bundles starting from \$9790 inc GST

Overview Cameras

Dakota Micro, the makers of Ag-Cam, have released an entry level camera monitoring system with impressive features at a great price.

Single camera kit with 7" monitor **\$363 inc GST**

Single camera kit to suit CFX-750/FmX **\$230 inc GST**

- Watertight
- Works day or night
- 18mth warranty
- Unique mounting bracket

Vineyard Sprayer Demonstration

In December we ventured north up the Riddoch Hwy to Keppoch to put the Bertolini Grape Sprayer through its paces. A good number of growers turned out to see this new concept of sprayer. Using hydraulic drive holder fans the machine effectively covered a large shiraz canopy with a very low tractor horsepower requirement. A big thankyou to Sido Orton for hosting us in your vineyard.

The Bertolini Sprayer achieved excellent coverage on the undersides of leaves in the middle of the canopy

We've moved...

We are all settled in at our new location - 2 Lucindale Rd (between KubPower & South East Seeds). There's always products on demonstration or sprayers being built, drop by - we are open M-F 8am-5pm
